HPE OneView - Arista Interoperability
Speeds up enclosure deployment with auto ToR switch port provisioning

1. Arista switch listens to HPE OneView message bus for state changes
2. HPE OneView admin deploys or updates enclosure with network uplinks templates
3. HPE OneView notifies listeners of enclosure uplink changes
4. Arista switch automatically creates ToR port provisioning request.
5. Network Admin approves ToR port provisioning request manually or automatically based on Arista policy.

Arista ToR switch ports configured to match HPE OneView network uplink definitions.
